

Center Name:

Drill Type: Coronavirus Outbreak

Exercise Type: Full

Date:

Participants:

Instructions

Walk through the scenario identifying what each participant will do along the way. Make use of your policy and procedure manual for internal actors. If external actors are involved, discuss with them each actor's role. If no external actors are involved, discuss which external actors would and should be involved and what roles they would play. Make notes in lessons learned and follow up with research on anything that was unknown at the time of the exercise. **BE SURE TO DISCUSS AND INVOLVE PATIENTS IF WILLING.**

Scenario

A patient arrives to the center at their scheduled time and checks in at the registration desk. During check in, the patient reports she recently returned from Wuhan, China. Patient is noted to have a cough.

- Does the center have a policy to offer up masks to patients/visitors with symptoms of respiratory illness?
- Are masks available at reception?
- Who does reception staff communicate positive travel screening to?
- Is the patient isolated? If so, where?
- How does staff further evaluate the patient?

The patient is found to have a fever of 101°F and cough + recent travel from Wuhan. How does staff respond?

- What PPE utilized? How is it disposed of?
- How does center communicate with authorities?
- Where does Center send patient for further evaluation? How is patient transported?
- How does Center clean/disinfect area and equipment contaminated by patient?
- How does Center track people who had contact with patient?
